

# One unified system for global visibility and financial control.

	deel.   aws	Other platforms
<div> Invoicing &amp; payments</div>	<div>✓</div> <div>One payment provider with terms set through AWS Marketplace—for consolidated invoicing and simple reconciliation.</div>	<div>✗</div> <div>Multiple vendor invoices, complex approvals, non-compliance, and manual payment tracking.</div>
<div> Insights &amp; reporting</div>	<div>✓</div> <div>A single dashboard for global people analytics, turning data into insights from onboarding to development, and more.</div>	<div>✗</div> <div>Fragmented data across systems, delayed insights, lack of global reach, and higher reporting errors.</div>
<div> Compliance &amp; tax confidence</div>	<div>✓</div> <div>Automated global compliance with built-in tax, payroll, and legal oversight from in-country experts.</div>	<div>✗</div> <div>Manual processes and limited local expertise increase audit and compliance risk.</div>
<div> Cost control &amp; ROI</div>	<div>✓</div> <div>Reduce vendor costs, consolidate software spend, and drive measurable operational ROI.</div>	<div>✗</div> <div>Overlapping tools inflate costs and reduce visibility into total spend.</div>
<div> Security &amp; procurement</div>	<div>✓</div> <div>Available on AWS Marketplace with pre-vetted security, standardized terms, and a simplified procurement process that accelerates purchasing.</div>	<div>✗</div> <div>Slower procurement cycles and inconsistent data security standards.</div>

“Getting one consolidated invoice from AWS makes processing so much easier for the accounting team. Plus, running that spend through AWS helps us hit our enterprise discount tiers. It’s a major win-win.”

Kyle Harsanyi,  
VP of Finance, ServicePower

A better way to manage global workforce spend
