

One unified platform.
Zero asset risk.

IT teams face constant challenges from shipping and securing devices to managing global inventory. Deel IT unifies every step in one platform, giving you full visibility, built-in security, and logistics support in 150+ countries.

Every device stays monitored, compliant, and under control—without manual tracking or vendor juggling.

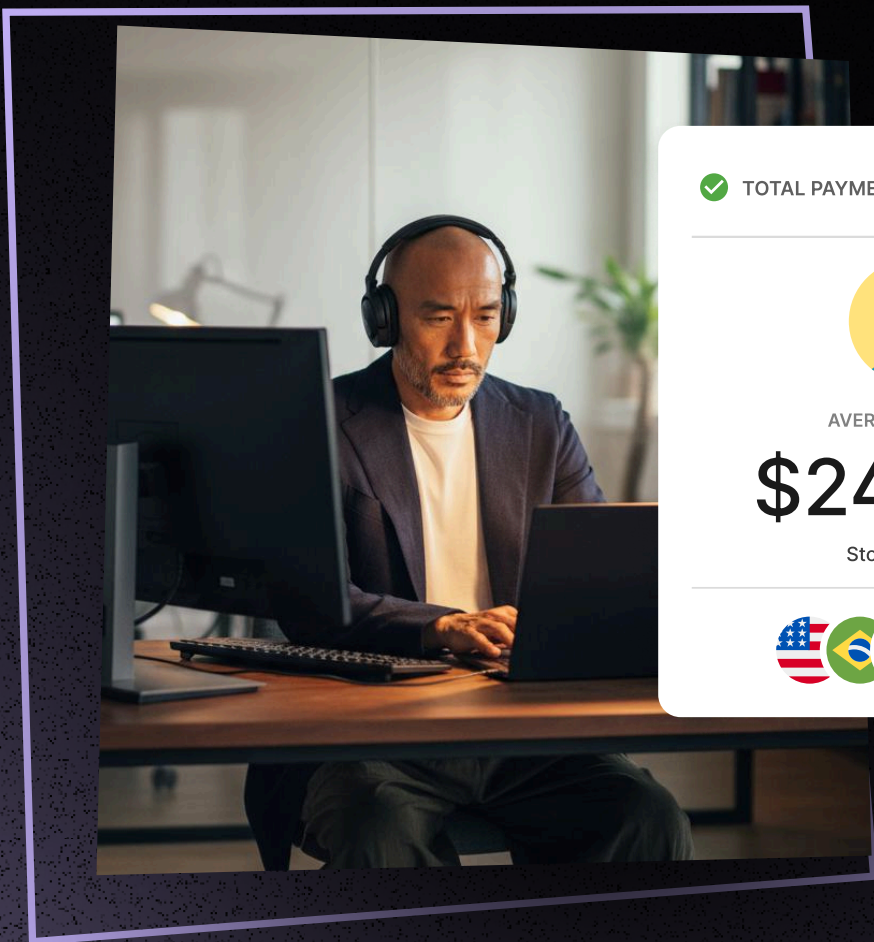

Global monitoring. Local care.

Our global IT and security teams track, configure, and protect every device 24/7. Wherever your team is based, devices stay monitored and secure so employees can stay productive—without adding to your ticket queue.

Security you can trust

Deel is independently certified for SOC1, SOC2, SOC3, and ISO/IEC 27001, giving customers complete confidence that their data is protected to the highest global standards.

Built on AWS. Proven to perform.

Deel IT runs on scalable, reliable AWS infrastructure that grows with your team. Customers can leverage existing AWS spend commitments while maintaining the flexibility to expand and support teams anywhere in the world.
